

Firefox

Rediscover the web

Firefox is a free alternative web browser that is faster, safer and easier to use than Microsoft Internet Explorer. Recent security exploits make Internet Explorer unsafe.

Reduce the risk of viruses, worms, spyware and other malicious software by switching to the most customisable and secure browser in the world!

Enjoy features such as tabbed browsing, a popup blocker, built in search and a feed reader (RSS) to keep up with the latest news headlines.

Thunderbird is the perfect companion for Firefox, featuring one of the most advanced junk mail filters available.

Both Firefox and Thunderbird can be easily customised for the way you browse the web and read your e-mail.
